

HOW TO LOAD
CURSE OF RA
DUAL FORMAT DISK

APPLE

Boot up your TEMPLE OF APSHAI disk following the loading instructions that came with your game. At the point where the computer asks you which level you wish to explore, remove your TEMPLE disk and insert your CURSE OF RA disk. Type in a number between 2 and 5 and hit the "Enter" key. You are now ready to begin play. At some point before leaving the Dunjon, you must remove your CURSE OF RA disk and put back in your TEMPLE OF APSHAI disk. To save a game or a level, use your CURSE OF RA disk. (This is a 16 sector disk).

TRS-80

Boot up your TEMPLE OF APSHAI disk following the loading instructions that came with your game. At the point where the computer asks you which level you wish to enter, remove your TEMPLE disk and insert your CURSE OF RA disk. Type in a number between 2 and 5 and hit the "Enter" key. Following that, the screen will say: LOADING DUNJONMASTER. You will then get a BREAK IN 6 message. Your disk is not defective. At this point, simply take out your CURSE OF RA disk and reinsert your TEMPLE OF APSHAI disk and type: RUN"DM" and you are ready to begin play. (This loading technique may seem cumbersome, but we did not have expansion keys in mind when we created the TEMPLE OF APSHAI).
